T O W H O M I T M A Y C O N C E R N ,

Are you looking for a [job title] with:

- Hackathon experience?
- 7+ years of experience working with Java?
- Knowledge of DevOps principles and practices?
- Open-source contribution to GitHub repositories?
- Excellent application of data structures and algorithms?

If so, then you need look no further. You will see from my enclosed resume that I meet all of these qualifications and more.

I am a rather enthusiastic individual looking to gain professional experience in my field. The pandemic has disadvantaged me, as I was unable to gain this professional experience. Despite this setback, I took it upon myself to fill in the gaps of experience by improving upon my knowledge and skills via my own projects and through contributions to GitHub and Stack Overflow. I confidently consider myself a valuable asset, but it is not the best idea for there to be only one valuable asset, so I take time to build up those around me as well, and more often than not, they succeed. If you are looking for a task-driven self-learner yet also a team-player who does not neglect his teammates, then I am here to please.

I would very much like to discuss opportunities with [Company name].

Thank you for taking the time to review my resume. I look forward to talking with you.

Sincerely,
Jonathan Taylor
